Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22-26, drawn to a computer system ID for identifying a computer system, wherein the computer system ID is stored on the computer system, and is generated during the installation of a single software application on the computer system, classified in class 705, subclass 50.
- II. Claims 8-18, drawn to a single computer system ID for identifying a computer system, the computer system comprising a plurality of components, each component having a unique identifier, wherein the single computer system ID comprises a plurality of hardware device identifier portions, each hardware device identifier portion associated with a single component of the computer system, wherein the single computer system ID represents the computer system plurality of components and wherein the single computer system ID comprises a variable number of bits corresponding to the ability to differentiate multiple computer systems based on a particular component having a unique identifier wherein the particular component is one of the plurality of components, classified in class 705, subclass 56.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a computer system ID for identifying a computer system, wherein the computer

Art Unit: 3694

system ID is stored on the computer system, and is generated during the installation of a single software application on the computer system. Invention II has separate utility such as a single computer system ID for identifying a computer system, the computer system comprising a plurality of components, each component having a unique identifier, wherein the single computer system ID comprises a plurality of hardware device identifier portions, each hardware device identifier portion associated with a single component of the computer system, wherein the single computer system ID represents the computer system plurality of components and wherein the single computer system ID comprises a variable number of bits corresponding to the ability to differentiate multiple computer systems based on a particular component having a unique identifier wherein the particular component is one of the plurality of components. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Behrang Badii whose telephone number is 571-272-6879. The examiner can normally be reached on Monday-Friday.
